

# Inner tents and floors

**For even better comfort and protection from ground moisture and insects!**

## IT Solo pitching kit

Used for putting up the inner tent on its own, that is, without a Nordic tipi. Practical in warm conditions although it is not rainproof or storm-resistant.

## Inner tents

Tentipi® inner tents are available in three grades – Pro, Comfort and Base. Any grade of inner tent can be used with any of our tent models size 5, 7 and 9.

Tentipi® Nordic tipis have been designed to function well even without an inner tent. Nevertheless, an inner tent does provide a number of advantages:

- Protects against condensation which is especially important for Nordic tipis made of lightweight material.
- Condensation caused by ground dampness is eliminated because the floor covers the entire ground area of the tent.
- Heat is distributed more evenly when retained by double tent fabrics.
- More reliable protection against insects.

### Easy to put up

Is put up together with the Nordic tipi or can be easily detached by using the reliable quick fastenings.

### Ventilation

Closable insect net over the smoke opening; fits tight around the central pole. Three fresh air intakes

are built into the inner tent (Pro and Comfort; Base lacks these features). Together with the mosquito-net fitted door, these provide good ventilation on warm sunny days when the mosquitoes are in action.

### Net roof holders

Reduce the risk of damaging the net when using a stove or open fire.

## Floors

Tentipi® floors are available in two grades – Pro and Comfort. Either grade of floor can be used with any of our tent models (except only Comfort grade is available in size 15).

### Need not be detached

Is automatically in the correct position when the Nordic tipi is put up because it need not be detached when packing the tent.

### Zip cover

Protects the zip from dirt.

### Stretches out nicely

The tent's stretching device makes it easy to get the floor nice and flat. It also improves the seal between the floor and fabric, helping to keep insects out.

|                    | PRO  |     |     | COMFORT  |     |     |     | BASE  |     |     |
|--------------------|--|-----|-----|--|-----|-----|-----|---|-----|-----|

## Tentipi

- has its roots in Swedish Lapland – the homeland of the Sami káta
- stands for passion and expertise, especially when it comes to Nordic tipis
- has three decades of experience as the world-leading manufacturer of Nordic tipis
- has several patents and design rights for its original, ingenious design
- cares so deeply about its products that it only makes its Nordic tipis in its own fully-owned factories
- exposes every fifth tent to a full-scale rain test
- views every Nordic tipi as a unique product and gives it a personal ID to make it possible to track its components and specific design
- cares about previous customers by always striving to make new features also fit the older models of tents.

## Why people choose Tentipi®

Because they think it is worthwhile investing extra money in order to get a superior product.

Because they believe that Tentipi's sole focus and passion for Nordic tipis give a better functioning and more reliable Nordic tipi.
