

Safir 7 cp and Safir 9 cp are in fact by far our most sold models so it's obvious that Safir's extra air intakes and world-class fabrics are highly appreciated by our customers.

Safir is used by professionals in the most extreme conditions – in ice fields, in storm force gales, on top of glaciers or in blazing heat.

Explorer Mikael Strandberg chose a Safir 7 cp for his Siberia expedition. Mikael has been described as “the best contemporary explorer in the world” by the Explorers Club of London.

For extreme expeditions, challenging trekking, or a multitude of different outdoor activities – Safir is perhaps the world's most versatile tent for people who need maximum performance and flexibility.

### Key features

- Three rain-protected, mosquito-netted air intakes at bottom edge of tent for optimum ventilation and smoke control
- Best quality fabrics. It is the relentless pursuit of the best fabric – chosen for performance not price – that puts Safir in a class of its own. The focus is especially on all aspects of fabric strength, water repellency, the feel of the fabric, and colour fastness. The differences are apparent when comparing with other fabrics on the market
- Ventilator cap: double piece with six opening points, controllable from inside the tent; integral chimney opening; mosquito protection to top piece; tighter fitting by use of fibreglass spacer rods
- Storm cords: with reflecting threads woven into the cords; pre-tied and fitted with holders
- Advanced compression bag for tighter packing
- Mosquito protection sewn in to top edge of tent
- Enhanced floor fitting with toggle and ring arrangement
- Reinforced edging for better wear resistance around bottom edge of tent
- Three minutes to erect
- Standing room
- Class-leading storm resistance
- Use with open fire or stove
- Use on its own or with any model of floor or inner tent
- Door: double-zip with integral mosquito protection
- Hanging loop for drying

### Breathable – Cotpolmex Pro

Highly breathable and really strong cotton/polyester fabric. As Cotpolmex C, but with better shape stability and improved aesthetic appeal. To our knowledge, the finest cotton/polyester fly fabric available globally.

### Non-breathable – Traillix Pro

One of the absolute strongest and finest lightweight fabrics available on the tent market. Very light, waterproof fabric manufactured from nylon 66. Ripstop reinforced, silicone-coated on both sides and UV-protected.

### Tentipi

- has its roots in Swedish Lapland – the homeland of the Sami káta
- stands for passion and expertise, especially when it comes to Nordic tipis
- has three decades of experience as the world-leading manufacturer of Nordic tipis
- has several patents and design rights for its original, ingenious design
- cares so deeply about its products that it only makes its Nordic tipis in its own fully-owned factories
- exposes every fifth tent to a full-scale rain test
- views every Nordic tipi as a unique product and gives it a personal ID to make it possible to track its components and specific design
- cares about previous customers by always striving to make new features also fit the older models of tents.

### Why people choose Tentipi®

Because they think it is worthwhile investing extra money in order to get a superior product.

Because they believe that Tentipi's sole focus and passion for Nordic tipis give a better functioning and more reliable Nordic tipi.
